A

- Admin will be able to view the list of players with the below- mentioned details:

1. Excel Sheet Import:
  - The system should support the bulk import of player information from an Excel spreadsheet.
  - The system should validate the Excel sheet format to ensure compatibility.
  - It should handle common Excel formats such as .xls and .xlsx.
  - Admin will be able to import the existing customer that have the following information:
    - Customer Number
    - First Name
    - Last Name
    - Username
    - Phone Number
    - Email Id
    - Hall Id

- **Note:**
  - In the excel sheet there must be customer number and Username.
  - We have only taken into account the data from the import table that is listed above; if any information is not valid, a missing error will be shown with the error details.
  - The excel sheet needs to have a header section with the information list displayed.
  - If there is any thing missing that file will not be Imported.
  - In the excel sheet there are lot of hall Id at the time of importing when the Hall Id not match with the existing data that Hall Id will be shown in the Inactive hall section and the hall status will shows as inactive and the system will not send the mail to that player.
  - If all information are validated then only data will be imported in DB.

- When the data is imported Imported customer information will be displayed in the Approved Player module.
- Only the Imported customer will be able to login using the special characters specified in the import list.

- When the admin will import the customer the system will send the email to all those existing customers with an email and there isn't any expiry time for the reset password link.
- **If the user name have two word first word is for First name and the second word is for last name.**
- **If the user name have Three word First two word is first name and third word is the last name.**
- **If the user name have four word first two word is for First name and the last two word is for last name.**

- The Hall IDs listed in the import table list will be categorized based on the hall number. The specified hall number is shown below.
  -
100,120,140,160,180,200,220,240,260,280,300,320,340,360,380,400,420,440,460,480,500,520,540,560,580,600,620,640,650,660,680,700,720,740,750,760,770,780,790,800,810,820,830,840,850,860,870,880.

- **Example 1: When the admin imports the data, the data will be moved to the 100 Hamar Hall. In the import list, Hall Id will be represented as 47-100-01. In the middle of the hall, Id 100 will represent the hall number.**
- **Example 2: 47-120-01 the players in this hall id will be moved to 120 Hokksund hall.**

- **Example 3: 47-440-01 the players in this hall id will be moved to 440 Finnsnes hall.**

- **Note :Import excel and export phone number is for only admin and not required for agent panel.**

2. Player Information Fields:
  - The import will allow for the inclusion of basic player information such as Name, Email address, and any other relevant data.
  - The system should be designed to accept entries where the Photo ID is not provided.

3. Contact Information Handling:
  - For each player, the system should accommodate either a Phone Number, an Email Address, or both.
  - If a Phone Number is provided, it should be validated to ensure it follows the required format and is unique.
  - If an Email Address is provided, it should also be validated for proper format and uniqueness.
  - Duplicate or conflicting contact information should be flagged for review.

4. Data Validation:
  - The system will perform validation checks to ensure data accuracy and integrity during the import process.
  - Error messages will be displayed for any data inconsistencies, missing required fields, or improper formats in the Excel sheet.

5. Feedback and Confirmation:
  - Upon successful import, the system will ask for the confirmation of the import process, indicating the number of players that will be added to the database.
  - If there are any issues during the import, clear error messages will be presented to the admin to facilitate corrections.

This functional requirement ensures that the system efficiently manages player data while accommodating flexibility in capturing contact information, especially in cases where Photo ID is not mandatory. It also emphasizes data validation and error handling for a smooth import process.

B

- We need to hide the POINTS data from the Admin/Agent Panel as well

C

Details that will be provided in the excel we are importing

- Unique ID (Customer Number)
- Username + Surname
- Nickname
- Phone Number
- Email address
- Balance
- Hall Number (can be referred as hall id): We presume that the hall number corresponds to the hall ID generated by the system when a new hall is added. If you already possess unique IDs for each hall, then we need to include an input field where you can input the hall ID during the addition of a new hall. So that system can match the hall number from the system and assign them accordingly.

Note

- **If we add the existing user through xls/xlsx file. it needs to match with the hall id.**

- **Player can be with the mail, the phone, or both. Additionally, import players without a mail and phone. The player must then speak with staff to add a phone number or email.**

Query

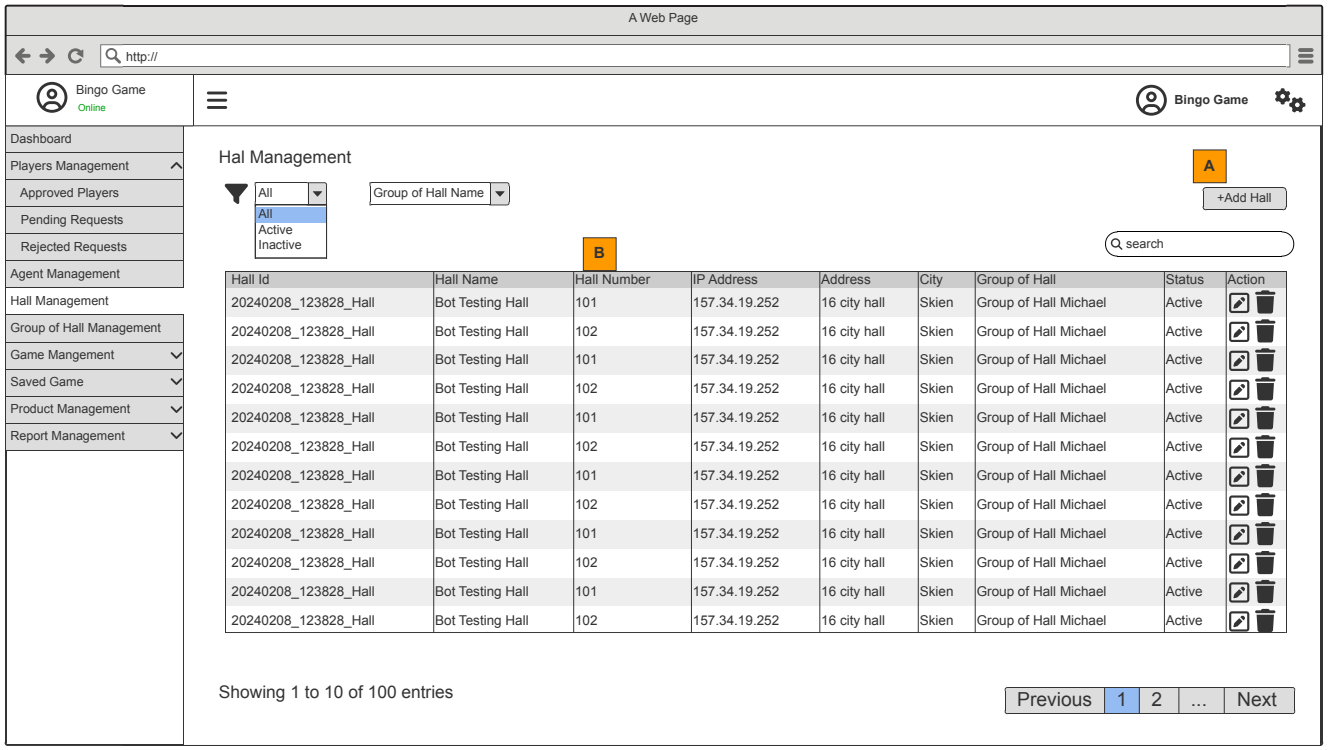
Question: existing players with hall id that do not match any of our current hall id should not be imported.

Answer : If hall is not available in our System, we can move that players to "Inactive Hall" for now as inactive Status, Agent can then move that players to other hall and can change the status

Query:

- Please confirm, all the players added by importing the excel sheet will be considered as the Online Player

Answer: They will be added to their hall, and can play in hall and online.

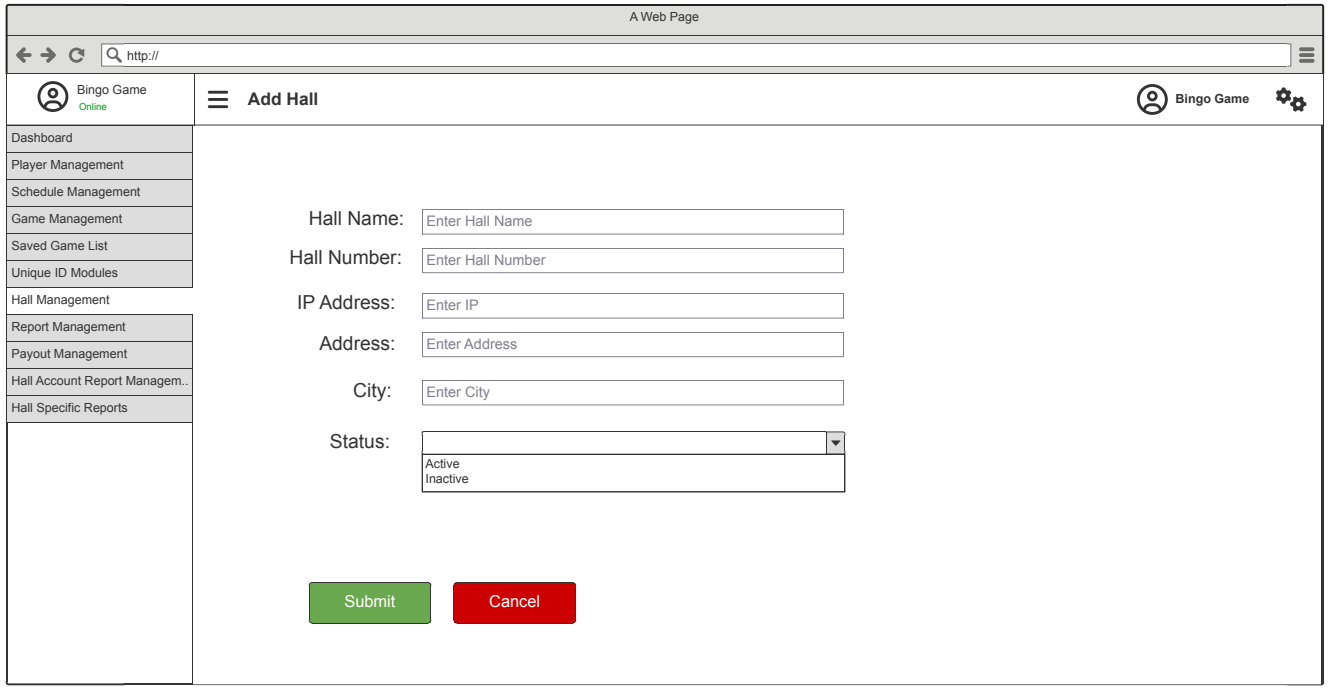


A

- Once admin clicks on the Add hall, admin will be redirected to the hall creation page.

B

- Hall number will be added in the column.



A

- Here, in the add hall page, Hall Number field will be added.

ADD CANCEL

A

- Admin will be able to manage the access to the following module for each agent:
Player Management (By default to all the agents)

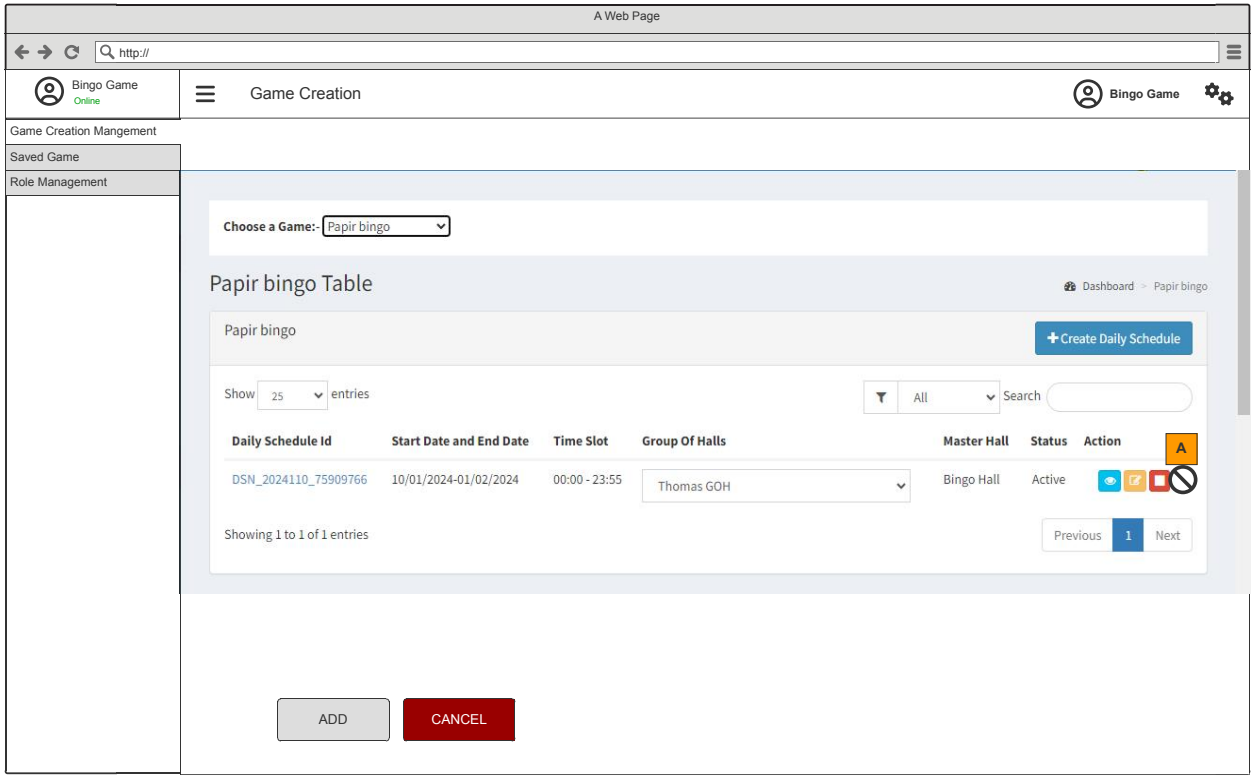
Schedule Management:
- Scheduled created by admin will be visible to the agent.
- Scheduled created by admin schedules will not be editable by the agent
- Admin will be able to create and edit their own created schedules
- **Add Schedules**
- Agents of same hall can use the schedules created by another agent.
- Agents of same Group of hall use schedules.

Game Creation Management:
- Agent will only be able to add the halls of their group of halls and not others
- Agent can use the schedule created by the admin and other agent of Same GOH

Saved Game List:
- List of all the games that are saved by the agent itself and the admin.
- **Agent's of the master halls will have access by default independent of the access from the admin side.**

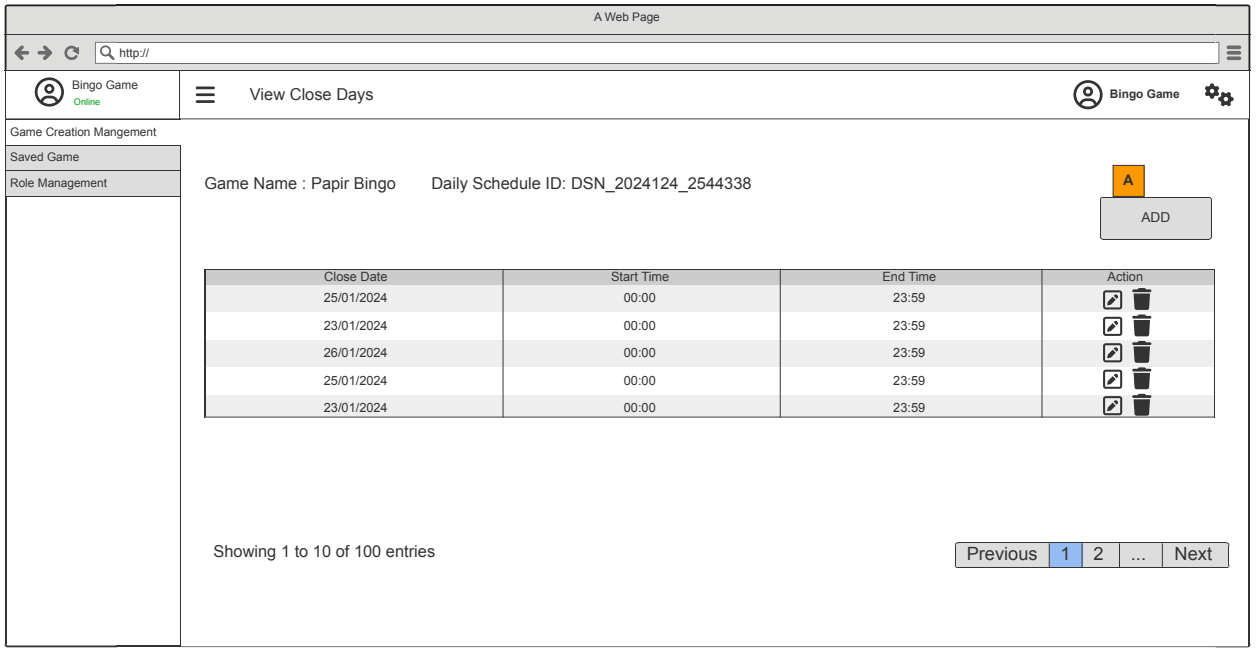
Physical Ticket Management
Unique ID Management
Report Management
Wallet Management
Transaction Management
Withdraw Management
Product Management
Hall Account Report
Hall Account Report - Settlement
Hall Account Specific report
Cash In/Out Management (By Default)
Payout Management

Note: The agent will have access to hall-specific details. For instance, if the agent is logged in with the IP address associated with Hall 1, they will be able to view only the details of that specific hall across all modules.
Games created by agents will be listed for the admin, the agents themselves, and the intended recipients of the games.
The agents will be capable of creating games for all the halls designated within the group of the currently logged-in hall.

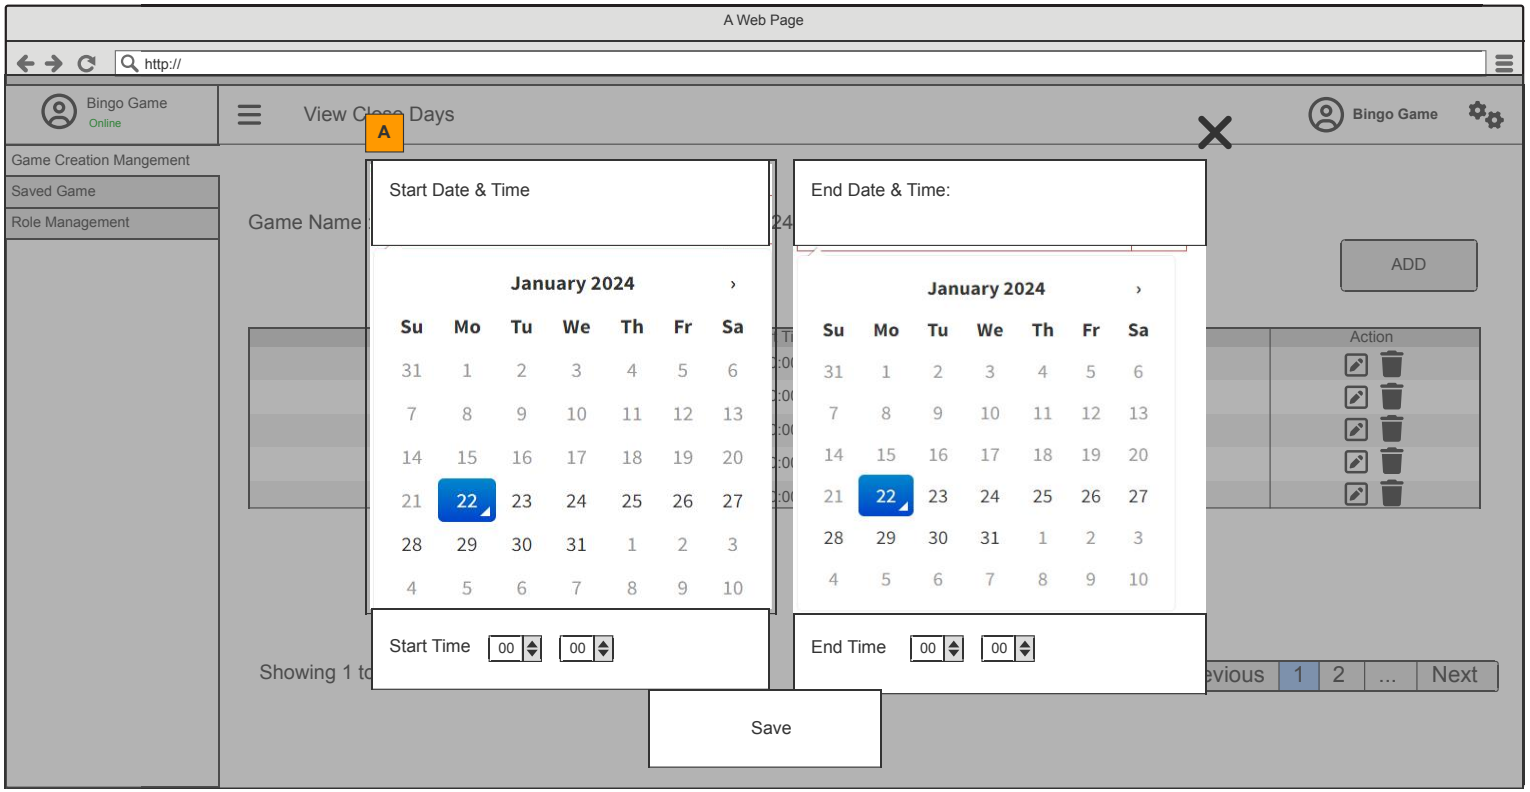


A Once admin clicks on the stop icon, admin will recieve the pop-up to confirm the close days.

Note:Currently we have displayed this for Game 1 only, but we will implement this close game functionaliity for All Game 1, 2, 3, 4 & 5.



A Once admin clciks on the add button, admin will receive to the add date & time pop-up.



A

Admin will be able to select the start date & time and End Date & time for closing the game.

For selected close days, the players will not be able to join the game and status will be dispalyed as "Closed" for players.

Case 1: Single Close Day
If Admin wants to select the close day for a single day, then admin have to select the same date & time for both start date & end date.

For example,

If admin wants to set the 25/01/2024 as a close day, then admin will have to select

Start Date & Time as: 25/01/2024 & 00:00
End Date & Time as: 25/01/2024 & 23:59

Case 2:Multiple consecutive days

If admin wants to select the close days as 25/01/2024 to 28/01/2024 then admin will select start date & end date as:

Start Date & Time: 25/01/2024 & 00:00
End Date & Time : 28/01/2024 & 23:59

So for this 4 consecutive days game will remain closed.

Case 3: Random multiple days

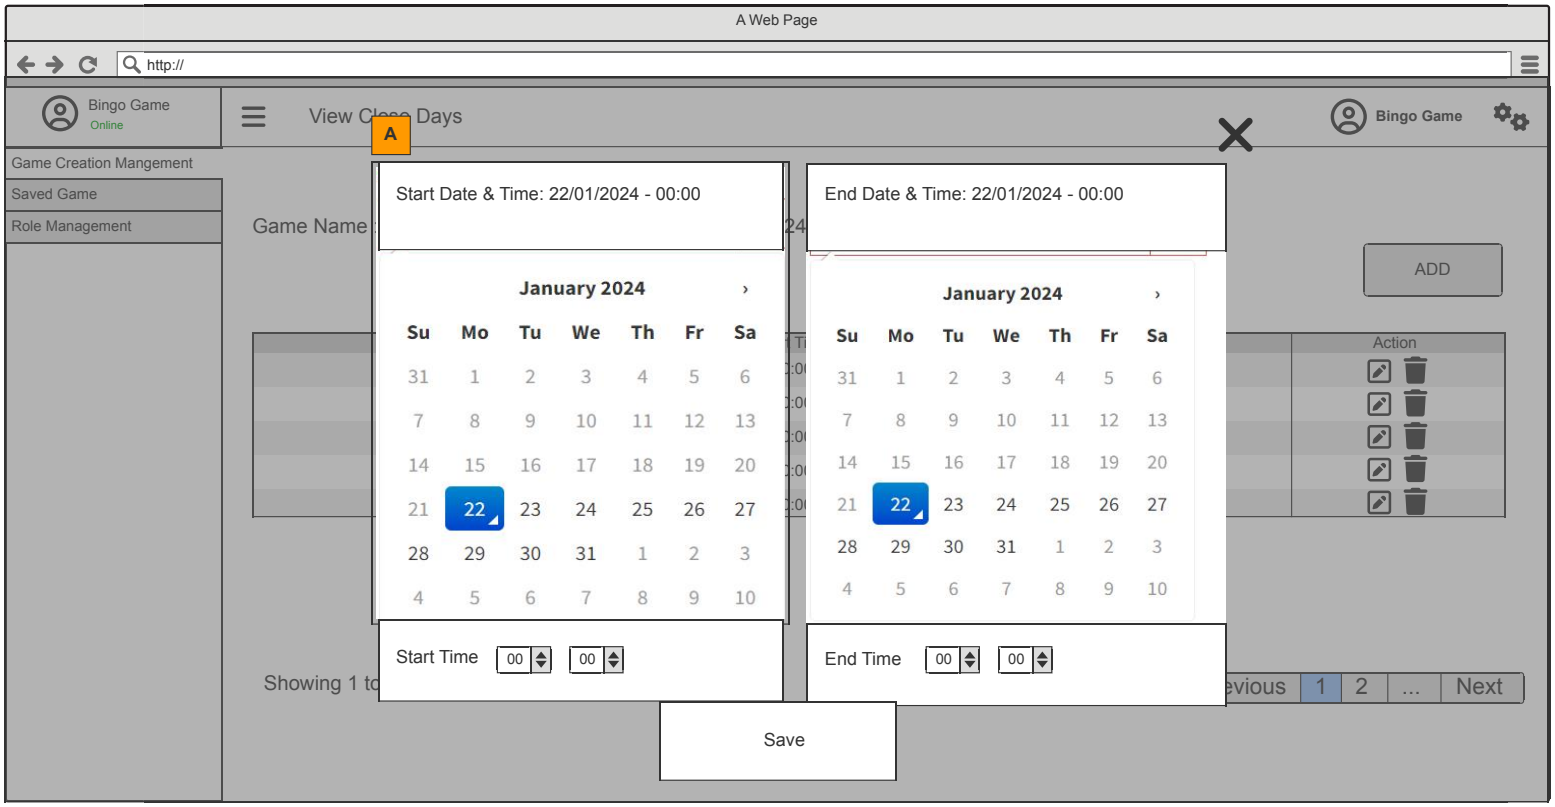
If admin wants to select the random days, 25/01/2024 & 28/01/2024 as a close days then admin will have to select the start date & end date for both the dates separately.

Start Date & Time: 25/01/2024 & 00:00
End Date & Time: 25/01/2024 & 23:59

Save & then select for 28th Jan:

Start Date & Time: 28/01/2024 & 00:00
End Date & Time: 28/01/2024 & 23:59

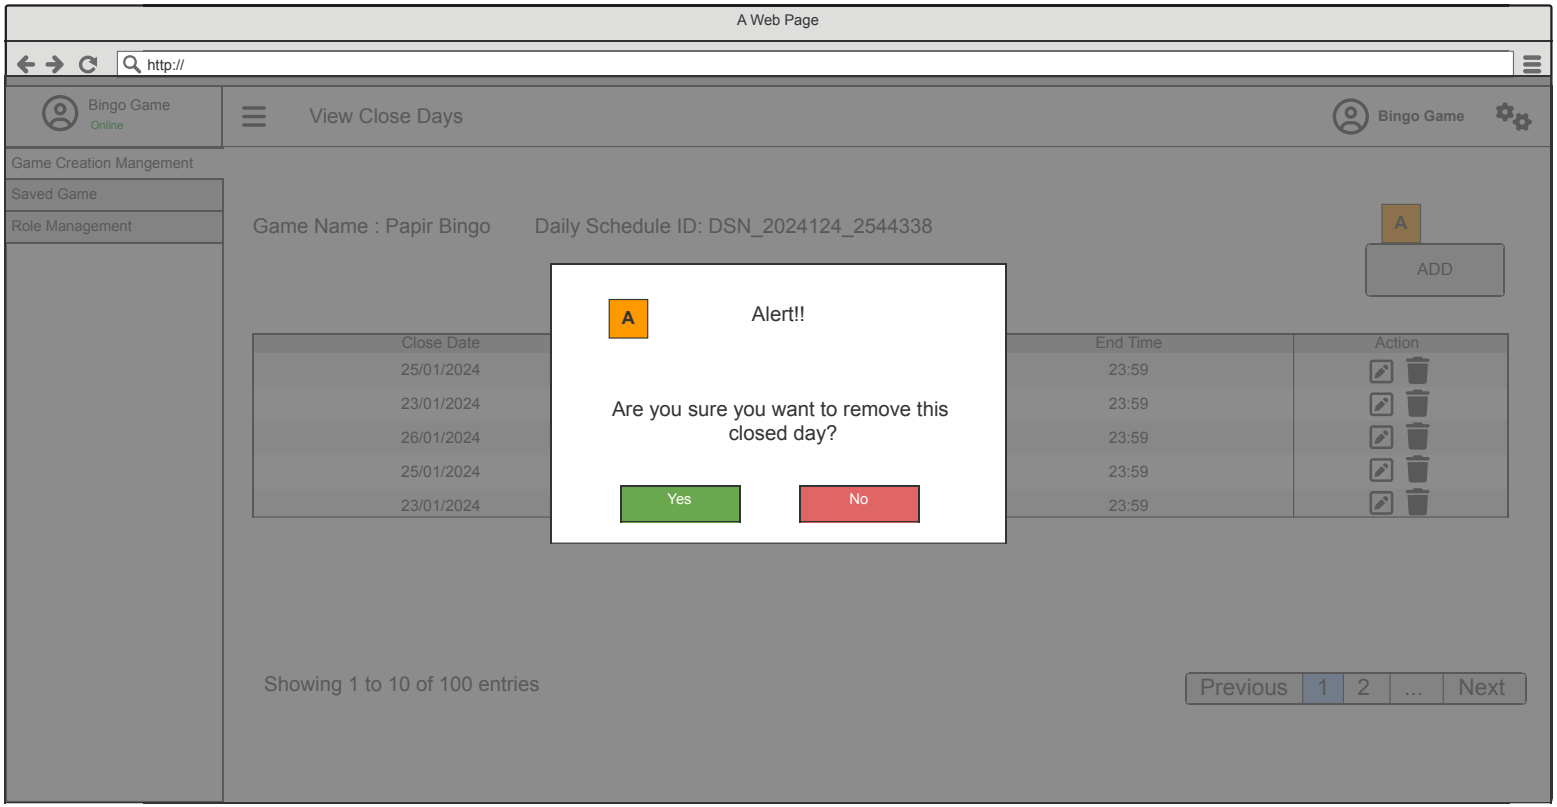
Note:Currently we have displayed this for Game 1 only, but we will implement this close game functionaliity for All Game 1, 2, 3, 4 & 5.



A

Admin will bea ble to edit the close day details from this section.

Note:Currently we have displayed this for Game 1 only, but we will implement this close game functionaliity for All Game 1, 2, 3, 4 & 5.



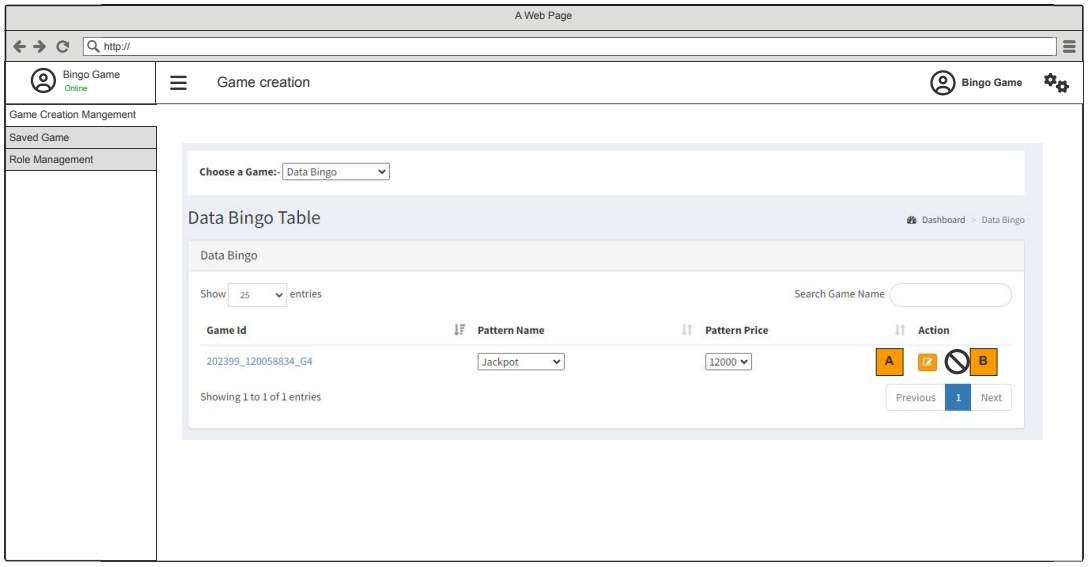
A

Admin will receive a confirmation pop-up once admin clicks on the remove icon from the closed days.

Note:

Once admin clicks on Yes, the closed day will be removed from the closed days list.

Note:Currently we have displayed this for Game 1 only, but we will implement this close game functionaliity for All Game 1, 2, 3, 4 & 5.

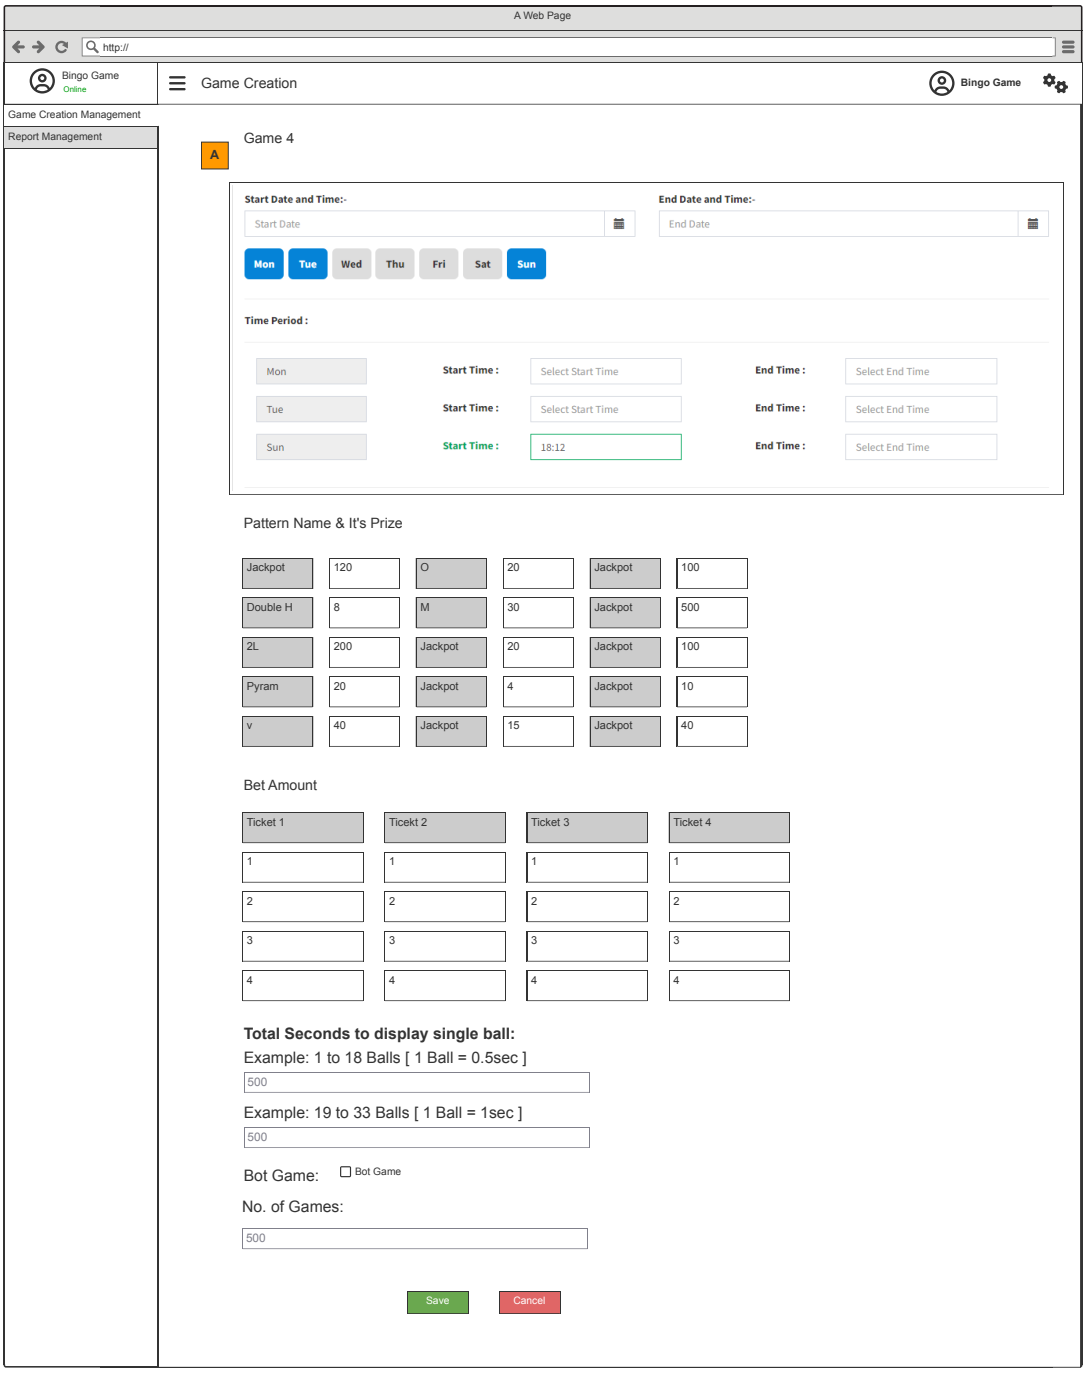


A Once admin clicks on the edit icon he will land on the edit game page.

Here 2 new columns will be added:

- Start Date & Time
- End Date & Time

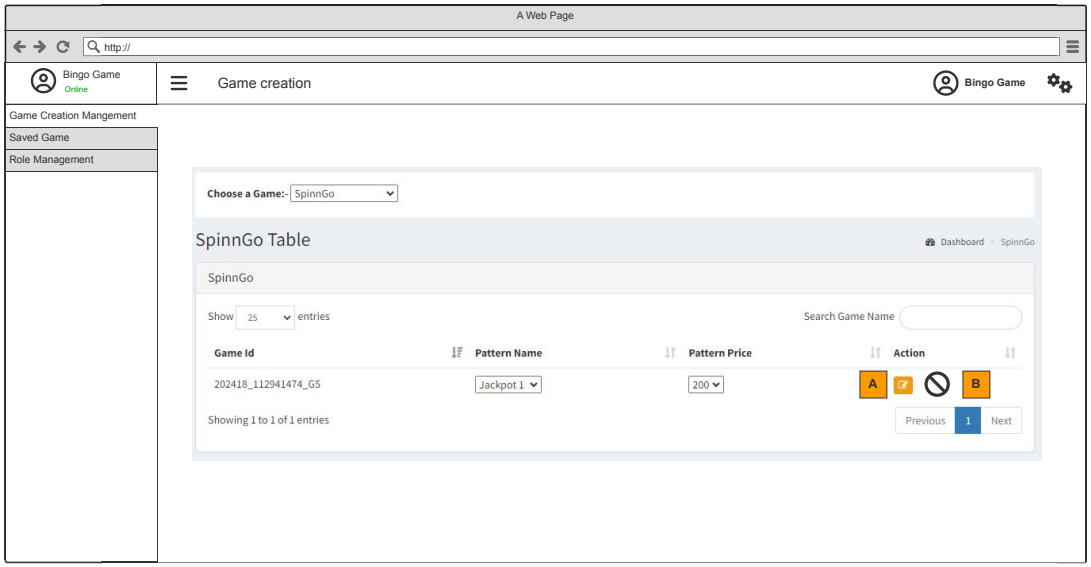
B Once admin clicks on this close day icon, admin will be redicted to the Close Tag page to manage the close days for Game 4 where he can add, edit & remove the close days as descried in above-mentioned wireframes.



A In timings, admin will be able to know the start date & time and End date & time.

Admin will be able to edit set & edit the timings from the edit section itself.

Note: There will not be new game ot new schedule id created for Game 4 as it is single player game, the timings will be overriden once admin edits the start date & time and end date & time from this section.

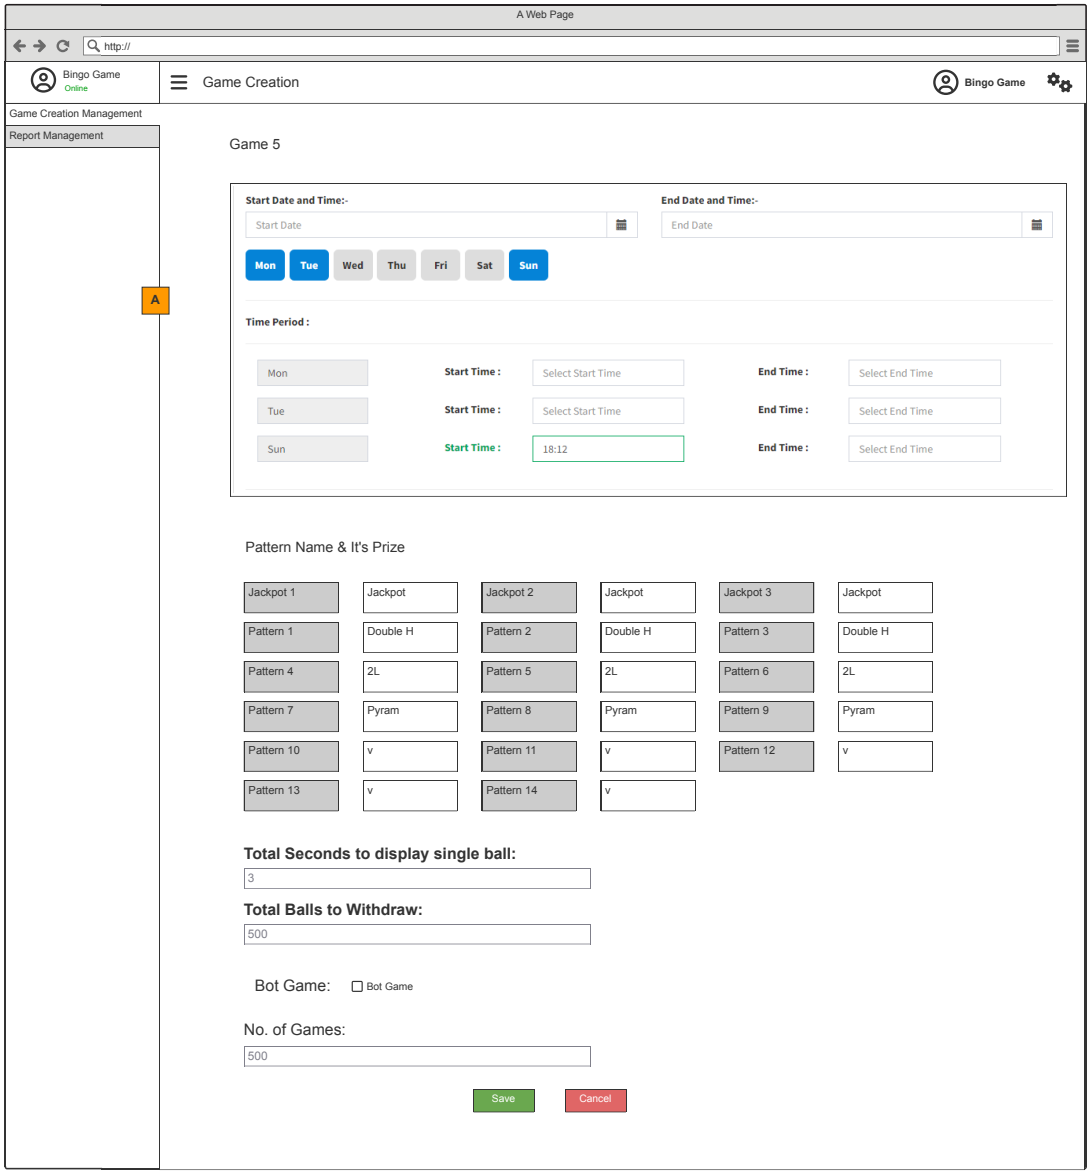


A Once admin clicks on the edit icon he will land on the edit game page.

Here 2 new columns will be added:

- Start Date & Time
- End Date & Time

B Once admin clicks on this close day icon, admin will be redicted to the Close Tag page to manage the close days for Game 5 where he can add, edit & remove the close days as descried in above-mentioned wireframes.



A In timings, admin will be able to know the start date & time and End date & time.

Admin will be able to edit set & edit the timings from the edit section itself.

Note: There will not be new game ot new schedule id created for Game 5 as it is single player game, the timings will be overriden once admin edits the start date & time and end date & time from this section.

Query

Every day at the beginning, we have to create the XML file needed to send the mail.

1. To every agent who is available in the event that we need to send the mail, or solely to the designated agent.

2. Either every hall's withdrawal details, including name, account number, and amount, must be included in an xml file, or each hall's specific xml must be generated.

Note

This same process will be applicable for Agent users as well.
